

Business Travel Dashboard - User Guide

1. Introduction

This application allows you to visualize business travel statistics from a CSV file.

2. Running the Application

1. Open terminal in the project folder.
2. Run ``streamlit run bt_visualization_menu.py``.
3. A browser window will open with the dashboard.

3. Features

- Language toggle: English / Bulgarian
- Three visualizations: By employee, By month, By destination
- CSV export functionality

4. File Requirements

Your CSV file should be named ``exported BTs.csv`` and contain at least the following columns:

- Requestor Employee
- Start Date
- Type of Destination

5. Notes

Ensure required packages are installed using: ``pip install -r requirements.txt``
